Most stones require a concrete foundation that is not included in the price of the stone.

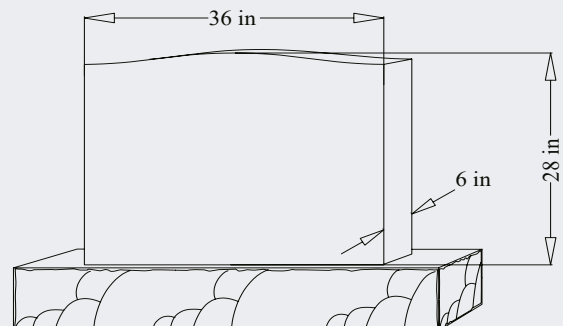

Some cemeteries require that they install their own foundations while others allow us to do it for you.

Please notify us of what cemetery you are dealing with we can take care of the installation process for you.

Most foundations are 12" in depth, flush with the ground and the same surface area as the base of your monument.

Foundations (if required by cemetery) will be billed to the buyer directly or will be completed by our company at an additional charge.
